JUL 31 2003

TECHNOLOGY CENTER R3700

Dear Sir:

In the Advisory Action of July 23, 2003, the Examiner stated that Redfern et al provides a movable base 58 and 20 attached to the plunger along with support members 28. Applicant respectfully submits that with respect to amended claim 1, the movable base (58, 20) of Redfern et al does not meet the limitation of "a movable base adapted to releasably constrain the needle". Rather, the needle restraint is performed by a non-moveable structure 28 which is distinct from the base.

With respect to claim 9, Applicant notes that Redfern et al does not provide a moveable base containing a hub of said first needle as is called for in the claim. Similarly, the remaining independent claims have claim language directed to a moveable base in which the base constrains or holds the needle base in position. Applicant respectfully submits that these are distinguishing features over the Redfern et al reference.

The Applicant would also direct the Examiner's attention to the prior amendment remarks on page 7 where the amended claim language is stated to address the concerns of the Pressly '952 reference. Further, Applicant draws the Examiner's attention to the remarks at the top of page 8 regarding the Terminal Disclaimer. Given the amendments to the claims, Applicant would defer entry of a Terminal Disclaimer

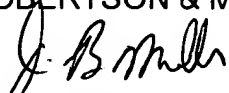

since the claims, as amended, are believed to be patentably distinct and therefore would require a withdrawal of the double patenting rejection.

The Examiner is encourage to contact the undersigned regarding any issues raised in this communication or the previous amendment for which entry is now requested.

Please charge any additional fees required by this Amendment to Deposit Account No. 50-2802.

Respectfully submitted,

ROBERTSON & MULLINAX, LLC

J. Bennett Mullinax
